Available for 24/7 rotational shift schedules

PROFESSIONAL SUMMARY

Customer-focused technologist with hands-on industry experience at Tata Consultancy Services and a Master's in Computer Applications (CGPA 9.0). Skilled in enterprise application development, cloud platforms (AWS), and low-code solutions (Microsoft PowerApps), with a strong track record of delivering user-facing software in cross-functional teams. Known for rapid skill acquisition across certifications and platforms, a team-first collaboration style, and a beginner's mind that thrives in structured learning environments. Committed to delivering customer success through clear communication, disciplined case ownership, and continuous improvement.

WORK EXPERIENCE

Assistant System Engineer | Tata Consultancy Services

March 2026 - Present

- Technical Training: Completed rigorous foundational training in enterprise application development, mastering Advanced Java, relational databases (SQL), and core software engineering principles including OOP, MVC architecture, and design patterns
- Project Delivery: Collaborated in a cross-functional team to design and build a prototype web application utilizing file-handling mechanisms and MVC architecture, practising structured problem-solving, peer code review, and iterative delivery
- Cross-Team Communication: Engaged with senior engineers and project leads to document technical requirements and translate them into implementable features, developing the stakeholder communication skills critical in client-facing support environments

CERTIFICATIONS

MTA: Introduction to Programming Using Python	*Microsoft*
Python Essentials	*CISCO Networking Academy*
AWS Academy Cloud Foundations Graduate	*Amazon Web Services*
AWS Academy Cloud Architecting Graduate	*Amazon Web Services*
Salesforce Trailhead: CRM for Lightning Experience	*Salesforce (in progress)*

TECHNICAL SKILLS

Programming	Python (MTA & CISCO Certified), Advanced Java, HTML/CSS
Data & Databases	SQL, Relational Databases, Database Management, Data Integrity, Data Validation, User Management
Cloud Platforms	AWS Cloud Foundations, AWS Cloud Architecting, SaaS Architecture Fundamentals
Low-Code / CRM	Microsoft PowerApps, Workflow Automation, Event-Driven Logic, MVC Architecture
Tools & Methods	OOP, DSA, Input Validation, Error Handling, Process Documentation, SOP Writing

SUPPORT-RELEVANT SKILLS

Technical Support	Troubleshooting, Root Cause Analysis, Issue Triage, User Workflow Diagnosis, Debugging
Customer Engagement	Customer-Facing App Design, App Demos & User Education, Technical Communication
Process & Docs	Case Documentation, Iterative Feedback, Process Improvement, Requirements Gathering
Collaboration	Cross-Functional Teamwork, Peer Mentoring, Knowledge Sharing, Stakeholder Communication

EDUCATION

MCA - Master of Computer Applications

Gayatri Vidya Parishad College for Degree and PG Courses, Visakhapatnam — **CGPA: 9.0**

Graduated July 2025

BSc - Computer Science
Sri GCSR College, Rajam **CGPA: 8.9**
Graduated July 2023

ACADEMIC PROJECTS

Self Check-In App for Hotel Management *Python, Database Management*

- Designed and deployed a customer-facing self-service application in Python, enabling end users to independently complete room booking transactions and reducing friction in the user journey
- Architected a backend database layer applying data integrity principles to ensure zero data loss; implemented input validation and error-handling logic - directly analogous to Tier 1 issue triage
- Conducted application walkthroughs with stakeholders, translating complex system behavior into accessible explanations to gather iterative feedback and drive usability improvements

RentSmart Rental Application *Microsoft PowerApps, Low-Code Platform, UX Design*

- Built a fully functional rental management application on Microsoft PowerApps - a metadata-driven low-code platform architecturally analogous to Salesforce's declarative tooling (Flows, App Builder, Lightning)
- Designed event-driven workflows and record management logic; incorporated iterative user feedback across multiple cycles, directly replicating the support loop: receive issue - investigate - resolve - verify
- Delivered live demos to user groups, fielding questions about system behavior and translating platform logic into plain-language explanations - equivalent to guided customer resolution sessions

Phone Number Tracing Tool *Python, Data Validation, Secure Development*

- Developed a Python-based diagnostic tool for structured data lookups, applying input validation and security best practices; documented edge-case behavior to create a reusable knowledge-base reference

LANGUAGES

English (Fluent) | Telugu (Native)
