Available for 24/7 rotational shift schedules

PROFESSIONAL SUMMARY

Enthusiastic and detail-oriented aspiring professional with a strong interest in Python programming, Artificial Intelligence, and emerging technologies. Possess a foundational understanding of Python, programming concepts, and problem-solving, with a keen interest in developing intelligent applications and exploring AI-driven solutions. Eager to apply technical knowledge through hands-on projects, learn new technologies, and contribute to innovative projects. A quick learner with strong analytical thinking, adaptability, and a passion for continuous learning and professional growth in the fields of Python development and Artificial Intelligence.

EXPERIENCE

iGenuine, Bangalore | Core Java Intern **JUNE 2025 – MAY 2026**

Completed an internship in Core Java, gaining practical knowledge of Java programming fundamentals, object-oriented programming (OOP), exception handling, collections, and basic file handling. Applied programming concepts to develop logical solutions, improve problem-solving skills, and understand software development practices. Gained hands-on experience in writing, debugging, and testing Java programs.

CERTIFICATIONS

Python For Data Science *IBM*
Certificate of Internship on AI *Intrainz Innovation*
Industry training certificate on AI *Intrainz Innovation*

TECHNICAL SKILLS

Programming	Python (IBM Certified), Core Java, HTML/CSS
Data & Databases	SQL, Relational Databases, Database Management, Data Integrity, Data Validation, User Management
Low-Code / CRM	Microsoft PowerApps.

EDUCATION

B-Tech - Computer Science and Engineering(DATA SCIENCE)
Audisankara college of engineering and technology, Gudur **CGPA: 8.24**

Graduated May 2026

ACADEMIC PROJECTS

SPEXA – Personal AI Assistant *Python, HTML,CSS ,Database Management*

- A voice-controlled AI assistant that allows users to interact with their computer using natural speech commands. .
- It activates through a wake word (“Hey Spexa”) and uses voice-based authentication for secure access. After login, SPEXA can perform tasks such as opening applications, controlling system functions, and answering user queries using AI.
- The system supports multiple languages including English, Hindi, and Telugu for better accessibility.
- It features a 3D holographic-style interface with voice visualization, and stores commands and login attempts in a MySQL database for security and monitoring.

Smart Attend – AI Attendance System *Python, HTML,CSS ,Database Management*

- Smart Attend – Face Recognition Attendance System is an automated attendance management system that uses Python-based facial recognition technology to identify and record student or employee attendance.
- The system captures faces through a camera, compares them with stored images, and marks attendance automatically.
- All attendance data is stored and managed using Excel sheets, which act as the database for maintaining records.
- A dashboard interface is used to visualize attendance data, making it easier to track presence, absences, and reports efficiently.
- This system reduces manual work, improves accuracy, and ensures a faster attendance process.
